

# Water quality data analysis just got simple... with EcoWatch for Windows & your YSI environmental monitoring instruments

1. See the whole picture using a single program
2. Spot trends with automatic data plots (daily, weekly, monthly)
3. Obtain statistics easily (min, max, mean, standard deviation)
4. Zoom in on a plot to study particular data sets
5. Run large studies (64,000 data sets)

Ask your rep for a **demo disk.**
